

New scalable, modular, web-based exhibit and event applications designed for growth.

Personal Edition

This edition is strictly for the corporate exhibitor. Whether you do one show or 200, our Personal Edition keeps track of all inventory including exhibit and graphic properties to marketing materials all in real time. ExhibitForce has taken a disjointed process managed with file folders and support staff and has provided an application that works to seamlessly integrate the exhibit planning and management process. This now enables anyone who has stake in making the show a success, more efficient, with less effort and more results.

- Organize trade show schedules, graphics, properties and records
- Collaborate with departments and team members 24/7 from the show floor, office or on the road
- Simple to maintain and update
- Jump start new employees by providing workflow based event information
- Deliver event ROI and outperform event budgets
- Reduce task and man-hour redundancies
- Develop a disaster recovery back up system.
